# Quick Guide
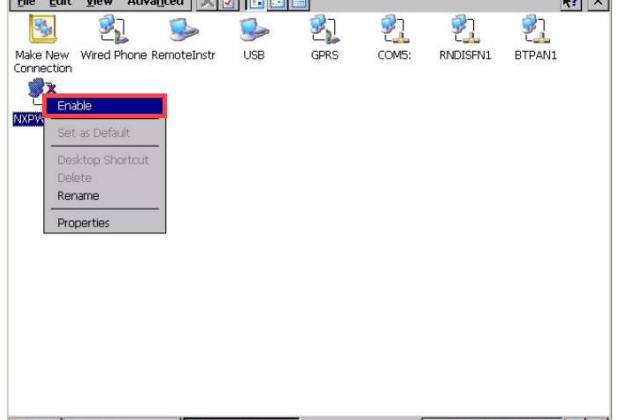

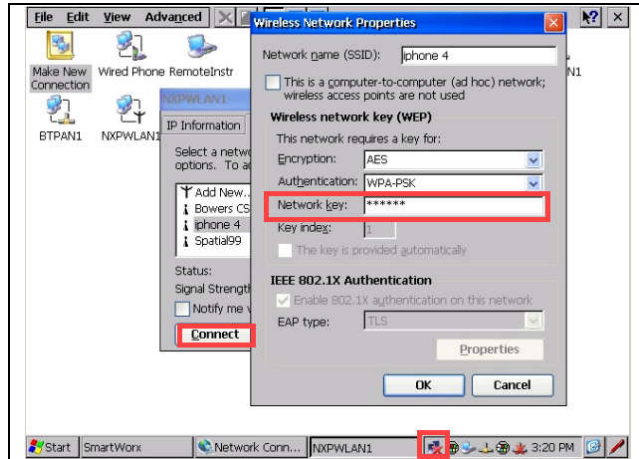

WLAN Internet Connection on a Viva CS

This Quick Guide will walkthrough connecting a Viva CS to a WIFI Hotspot

	1. Return to the Windows Menu From Home Screen select FN + F5
	2. Open **Network and Dial-Up Connections**
	3. Press and hold the **NXWLNAP1 (Or OWILNAP1 or similar)** icon to open the menu and select **Enable** to start the WLAN radio

Leica Geosystems

4. Then double click the icon at the bottom right of the screen and then select the **Wireless Information** tab. Then select the WLAN network that you wish to connect to from the list. Note you may have to enter a password depending on the network settings
   The status will change to connected once successful
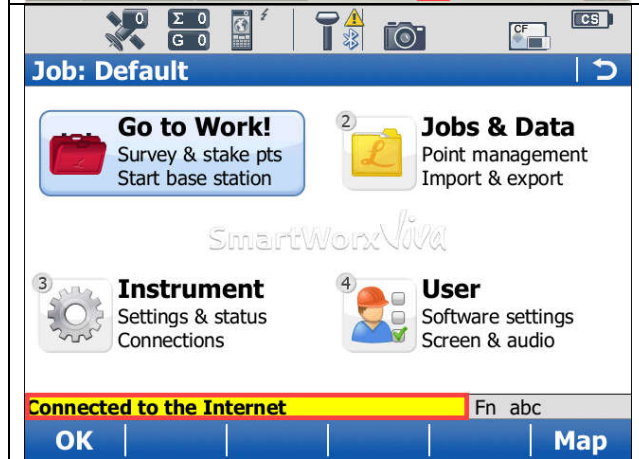

5. Return to Viva

   You may see an information message that the CS is Connected to the Internet
   If not proceed to Step 6

6. The Viva software will automatically use an internet connection from Windows.

   Therefore, it is important to turn off any Viva connections.

   From the Main Menu:

   Instrument > Connections >All other connections > Highlight CS Internet

   Press F3 - Edit

7. Verify that Use Internet Connection on CS is **NOT CHECKED**.

   Then select F1 – OK and return to the Main Menu.
